INTERACTIVE DESIGN 4

Project Checklist

NAME _____

DATE _____

Complete this checklist as you wrap up your project for final submission.
For a successful project, every check box should be checked.

Preliminary Work

☐ Infopack or Interactive Design Specifications document submitted
☐ Website semi-comp submitted

Setup

☐ Root folder structure is setup - *css*, *images*, *js*, *raw* folders present; *index.html* is main page
☐ Each page has a unique `<title>` element that shortly describes the brand and page content
☐ Each page has a unique `<meta>` element for the '*description*' that describes the page in more detail
☐ Each page has a '*reset*' or '*normalize*' CSS file linked
☐ CSS for the page is linked in an external file
☐ Each page has a '*modernizr*' Javascript file linked and properly applied with '*no-js*' class on `<html>`
☐ Page is not copied from a lesson or peer — this is cheating

Structure and Content

☐ HTML5 elements are used semantically including `<header>`, `<footer>`, `<section>`, `<article>`, `<aside>`, `<nav>`, `<figure>`
☐ IDs and classes are used appropriately and consistently with good naming conventions
☐ All floats are cleared with a '*clearfix*' class on each parent element
☐ All `<img>` have '*alt*' text describing the image
☐ Content titles or headings are formatted as `<h1>` to `<h6>` depending on importance
☐ Paragraphs or areas of text are formatted as `<p>`
☐ Lists of information are formatted as `<ul>` or `<ol>` with `<li>` for each list item
☐ All images are web format *(JPG, PNG, GIF)*, RGB colour space and screen resolution *(72ppi)*
☐ All fonts are web-safe *(Arial, Georgia, etc.)* or using webfonts *(Google Fonts, Typekit, Font Squirrel generated)*
☐ Special characters are escaped — for example & is changed to `&`

Testing

☐ Displays and functions correctly in Chrome and Firefox — plus Safari on Mac or Internet Explorer on PC
☐ Passes W3C validation — both HTML and CSS
☐ Check for code errors in Dreamweaver *(code line number is red)*
☐ Text is free of errors — check spelling *(in Dreamweaver under Commands > Check Spelling)*

Final Checks Before Submission

☐ All linked files, images, etc., are relative to the root folder *(no file:\\)*
☐ HTML is cleaned up, source formatting applied, comments added as an aid
☐ CSS is cleaned up, well organized, comments added as an aid
☐ Root folder is well organized, all files are present and in correct folder including original design file in '*raw*'
☐ Root folder is named *lastname_firstname*, compressed and uploaded to FanshaweOnline

Before you submit your project, **check the project brief** to make sure all project specifics are covered including amount and types of content, navigation items, social media links, number of columns, full-width backgrounds, etc.
